

VENDI VARDHAN BABU

Java Full Stack Developer | MERN Full Stack Developer

SPSR Nellore, Andhra Pradesh, India | +91 9100397713 | vardhanbabuvendi@gmail.com

GitHub: <https://github.com/Vardhan-vendi>

PROFESSIONAL SUMMARY

Java Full Stack and MERN Full Stack Developer and MCA candidate (CGPA 9.02/10) with a strong foundation in Core Java, Object-Oriented Programming, Spring Boot, SQL, and REST API design, built through hands-on projects including a Core Java banking application, JDBC-based persistence, and Spring Boot practice. Experienced building full stack web applications using React.js, Node.js, and Express.js, with proficiency in MySQL and MongoDB, and Git/GitHub for version control. Currently expanding into Machine Learning using Python. Strong analytical mindset with clear written and verbal communication. Seeking an entry-level Junior Java Developer or Full Stack Developer role in a collaborative Agile environment.

TECHNICAL SKILLS

Full Stack Expertise: Java Full Stack (Java, Spring, Spring Boot, JDBC), MERN Full Stack (MongoDB, Express.js, React.js, Node.js)

Programming Languages: Java, JavaScript (ES6+), Python, SQL

Java Technologies: Core Java, Object-Oriented Programming (OOP), Collections Framework, Exception Handling, JDBC, Spring, Spring Boot, Spring Data JPA, Spring Security

Web Development: React.js, Node.js, Express.js, HTML5, CSS3, REST API Design & Development, JWT Authentication

Databases: MySQL, MongoDB

Machine Learning (Learning): Python, ML Fundamentals, NumPy, Pandas

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Render

Practices: Agile Development, Debugging & Root Cause Analysis, Version Control, Clean Code Principles

Soft Skills: Verbal & Written Communication, Team Collaboration, Analytical Problem-Solving

PROJECTS

Core Java Banking System | *Java, OOP, Collections, Exception Handling, Serialization, JDBC, Spring Boot*

- Developed a console-based banking application in Core Java supporting account creation, deposits, withdrawals, fund transfers, transaction history, and account management using OOP principles such as encapsulation and composition.
- Designed custom exception classes for robust error handling and implemented HashMap- and ArrayList-based collections for in-memory account storage, with serialization to persist account data across sessions.
- Structured the codebase into model, service, exceptions, and utility packages for clean separation of concerns; extended the project with JDBC/MySQL persistence and a Spring Boot REST API using Spring Data JPA and Spring Security.

E-Commerce Platform (MERN Full Stack) | *React.js, Node.js, Express.js, MongoDB, REST APIs, JWT*

- Designed and implemented 10+ RESTful API endpoints for authentication, product CRUD operations, and order management with Express.js and MongoDB, applying role-based access control and JWT authentication to secure endpoints.
- Built a responsive React.js frontend integrated end-to-end with backend APIs; debugged and resolved backend logic and data-handling issues through root-cause analysis.
- Deployed the application with a React.js frontend hosted on Vercel, an Express.js/Node.js backend hosted on Render, and a MongoDB Atlas cloud database.
- Live demo: <https://mvstore-beta.vercel.app/>

YouTube Clone | *React.js, JavaScript, YouTube Data API v3, Context API*

- Integrated the YouTube Data API v3 to support video search, playback, and channel browsing functionality, structuring state with React Context API across 10+ components.
- Wrote clean, maintainable code and debugged integration issues between the frontend and the external API.

EDUCATION

Sree Venkateswara College of Engineering — North Rajupalem, Andhra Pradesh 2024 - 2026

Master of Computer Applications (MCA) — CGPA: 9.02 / 10.0 (Result Awaited)

Krishna Chaitanya Degree & PG College, Vikrama Simhapuri University — Andhra Pradesh 2021 - 2024

Bachelor of Computer Science — CGPA: 9.28 / 10.0

Gurthikonda Sreeramulu Junior College — Andhra Pradesh 2019 - 2021

Intermediate (MPC) — 98.4%

CERTIFICATIONS

- Full Stack Web Development Bootcamp — ExcelR, December 2022
- Python Programming & SQL Bootcamp — ExcelR, October 2022
- JavaScript & Node.js Bootcamp, and Google Drive Clone Project — DevTown
